

**“I found your course to be well organized and thorough. I gained the confidence to start placing my own implants. I would also recommend this course to restorative dentists who want to gain a solid grasp of the surgical aspects and gain confidence in treatment planning.”**

– Dr. Ken Lawlor, General Practitioner, Markham, Ontario

Murray Arlin, DDS, dip. Perio., F.R.C.D.(C)

Dr. Arlin received his D.D.S. from McGill University in 1977. After a one-year residency in general dentistry at the Jewish General Hospital in Montréal, he began his post-graduate program in periodontics at the University of Toronto, graduating with his diploma in 1980.

Dr. Arlin received his Membership and Fellowship in the Royal College of Dentistry of Canada in 1981 and 1983 respectively. He has taught at the undergraduate and periodontal post-graduate departments at the University of Toronto.

Dr. Arlin received his training in implant dentistry initially in 1985 and since then has been actively involved in continuing education. He has placed and documented more than 10,000 implants to date. He has lectured internationally and has authored many articles on periodontics and implant dentistry.

He is the co-founder of the Toronto Implant Study Club in Canada. As well, he is the sole founder of the Dental Hygienist Periodontal Study Club of Toronto. Dr. Arlin is the past president of the Ontario Society for Osseointegration. In 1995 he was elected to be the national chairman of the Canadian Academy of Periodontology's full day program on comprehensive periodontics.

Dr. Arlin carries on a full-time private practice limited to periodontics and implant dentistry, in Toronto.

#### Mission Statement

Many patients have missing teeth and may not be given the opportunity to consider implant dentistry. By upgrading our knowledge and skills, the patient, general dentist and specialist can all benefit. It is for this reason that I have made a commitment to responsible education and not to hold back information.

## For Registrants of Dr. Murray Arlin's Implant Mentor Program

### One Half Day, In Office Chairside Clinical Support with Dr. Fred Wauchope

IN OFFICE SUPPORT includes:

- Comprehensive dental implant treatment planning concepts from prosthetic design to surgical delivery
- Practical surgical parameters, protocols and techniques
- Treatment plan multiple cases together
- In office chairside support for first surgery(s)

Listen to what some of your colleagues are saying about this support and how it has helped transform their practices!

*“This was the perfect adjunct to my implant training, getting me started with confidence in my own office...”* Dr. J.L.

*“I highly recommend this service, my patients benefited from treatment options previously unfamiliar to me, and I accomplished the treatments proficiently and without stress...”* Dr. S.M.

*“This extra “coaching” gained me so much more insight, confidence and expertise...”* Dr. B.C.

Qualifications: must be a DDS and are currently registered for Dr. Murray Arlin's Implant Mentor Program. Must also purchase Implant Surgical Start up (minimum purchase of 5 implants and starter kit).

**For more information please contact the office of  
Dr. Fred Wauchope at 416-233-9638**

# Implant Placement: Hands-On

A Two-Day Surgical Skills Workshop  
Featuring Live Surgical Demonstration

Presented by  
**Dr. Murray Arlin**  
D.D.S., dip. Perio.,  
F.R.C.D.(C)

**Toronto, Ontario**  
**November 26 & 27, 2010**

# Implant Placement: Hands-On

A Two-Day Surgical Skills Workshop

Featuring Live Surgical Demonstration

## Course Objective

Over the last few years, the North American dental implant market has been growing at 12% to 15% per year, and more and more members of our adult population have heard about implants. They are asking their general practitioners for implants as an alternative to standard crown and bridge restorations. So after more than 20 years, dental implants

are becoming the standard of care and an extension of standard crown and bridge procedures.

This two-day Implant Program is designed for new surgical users who already possess basic surgical skills (i.e., dental alveolar flap procedures and suturing capability) but wish to expand their treatment capabilities to include placement of dental implants.

This is more than just a basic familiarization; rather, this program is an intensive and extensive tutorial that has the objective of turning attendees into implant users. By the end of this training program, you should have the skills needed to treatment plan and complete your first surgical implant cases. Information will also be presented and materials will be provided for marketing implants and educating patients about the benefits of implants.

## General Information

### Time

8:30 a.m. – 9:00 a.m. Registration

9:00 a.m. – 5:00 p.m. Lecture and hands-on workshop

Breakfast and lunch will be provided.

### Dates

Friday, November 26, 2010

Saturday, November 27, 2010

### Location

Nobel Biocare Training Centre

9133 Leslie St., Unit #100

Richmond Hill, Ontario L4B 4N1

### CE Credits

12 continuing education credits will be provided

### Tuition

\$1195 CDN + HST and \$350 material fee, which includes implant materials and PowerPoint for notes

### Accommodations

Accommodation suggestions available on request

“Murray is a wonderful innovator and communicator. This was the best hands-on course I have taken in 33 years. The two-day course was all meat and potatoes. No fluff!”

– Dr. Samir Barsoum, General Practitioner, Toronto, Ontario

## Two-Day Course Outline

### Introduction

- Patient selection, diagnosis and treatment planning
- Radiology, implant placement guides
- Importance of “prosthetically guided implant placement”
- Importance of bone quality and achieving initial stability
- Surgical protocol for the NobelReplace™
- Drilling equipment and instrument trays
- Standard surgical protocol for NobelReplace™
- Surgical protocol for varying bone densities
- Surgical protocol for immediate placement

### Posterior Implants

- One vs. two stage surgical protocol
- Placement to minimize bone loss
- Biomedical considerations – How many implants?
- Immediate vs. delayed extraction socket placement
- Immediate vs. delayed implant restoration

### Fully Edentulous

- How many implants?
- Fixed or removable?
- One vs. two stage surgical protocol
- Biomedical considerations – How many implants?
- Immediate vs. delayed extraction socket placement
- Immediate vs. delayed implant restoration

### Anterior Implants

- Evaluating the hard and soft tissues
- Preserving of the hard and soft tissues
- Augmenting the hard and soft tissues
- One vs. two stage surgical protocol
- Specifics of 3-dimensional implant placement
- Immediate vs. delayed extraction socket placement
- Immediate vs delayed implant restoration
- “Problem solving fully edentulous, partially edentulous and anterior implants”
- A potpourri of cases

### Who should attend

This course is intended for surgically oriented restorative dentists looking for a basic hands-on experience or refresher program for implant placement and the uncovering process. The emphasis will be on the basic drilling sequences for single-tooth and short-span edentulous segments with intact sites not requiring bone grafting procedures. Implant placement for the fully edentulous lower jaw for fixed bridge and overdenture applications will be covered.

“I found your lectures interesting, informative and inspiring. The lectures were comprehensive and very well presented. The net result was a well-integrated implant education experience.”

– Dr. Evan B. Friedman
